Description			
Alex,			
Ilagay na lang natin yung mga standard variables sa isang include file.			
<pre>\$log_user = \$session_user; \$log_group = go_get_groupid(\$session_user, \$astDB); \$log_ip = \$astDB->escape(\$_REQUEST['log_ip']); \$goUser = \$astDB->escape(\$_REQUEST['goUser']); \$goPass = (isset(\$_REQUEST['log_pass']) ? \$astDB->escape(\$_REQUEST['log_pass']) : \$astDB->escape(\$_REQUEST['goPass']));</pre>			
Para mas malinis and yung mga variables na naka-declare na lang is specific to the goAPIs function.

Thom,

I just realized that we can include the standard variables in goAPI/goAPI.php (instead of creating a dedicated PHP file for them).

I have tested this already and pushed the changes in our Github repo.
